

HR APPLICANT PROCESS SYSTEM

HR User Guide

HR Staff • HR Manager • Admin

This guide covers every HR-side module of the HR Applicant Process System. It is intended for HR Staff, HR Managers, and Administrators. Follow the sections in order for a complete understanding of the recruitment workflow.

Internal Use Only

This document contains operational procedures for HR personnel only. Do not share with applicants.

1 HR Roles and Access Levels

The system enforces role-based access. Each HR user is assigned one of three roles. Your role determines which modules and actions you can perform.

Role	Key Capabilities
HR Staff	Review applications, validate documents, run screening, schedule interviews, record evaluations.
HR Manager	All HR Staff capabilities + final hiring decisions (Accept / Reject / Hold).
Admin	All HR Manager capabilities + user management, job vacancy creation, maintenance tables, full reports.

Admin vs HR Manager

The Admin role includes everything the HR Manager can do, plus user account management, maintenance table editing, and full system configuration.

1.1 Logging In

1. Open the application and select HR Login from the main screen.
2. Enter your HR username and password.
3. Click Login. You will be directed to the HR Dashboard.

Failed Login

After multiple failed attempts, your account may be locked. Contact the system Admin to unlock your account.

1.2 Logging Out

Click Logout from any HR page to end your session securely. Always log out when leaving your workstation.

HR Dashboard

The HR Dashboard provides a real-time overview of recruitment activity. It is the first screen after login.

The Dashboard displays:

- Total number of open job vacancies.
- Applications pending review.
- Interviews scheduled for today or this week.
- Recent status changes and system activity.
- Quick-access links to common HR tasks.

Start Here

Use the Dashboard as your daily starting point. Check pending reviews and upcoming interviews before proceeding to individual modules.

3 Job Vacancy Management (Admin only)

Admins manage all job postings from the Job Vacancy Management page. HR Staff and HR Managers can view vacancies but cannot create or close them.

3.1 Creating a New Job Vacancy

4. Navigate to Job Vacancy Management.
5. Click Add New Vacancy.
6. Fill in the job title, department, employment type, and required qualifications.
7. Define the required documents that applicants must submit for this position.
8. Set the vacancy status to Open.
9. Click Save to publish the vacancy.

3.2 Editing a Vacancy

10. Select the vacancy from the list.
11. Click Edit and update the necessary fields.
12. Click Save to apply changes.

3.3 Closing and Reopening a Vacancy

To stop accepting new applications, change the vacancy status to Closed. Applicants will no longer be able to apply for closed vacancies. To reopen, change the status back to Open.

Closed Vacancies

Closing a vacancy does not affect applications already submitted. Existing applicants will continue through the recruitment process normally.

4 Viewing and Filtering Applicants

The Applicant List page gives HR a searchable, filterable view of all submitted applications across all vacancies.

4.1 Searching and Filtering

- Use the Search bar to find an applicant by name or email.
- Filter by job vacancy, application status, or date range.
- Sort results by submission date, name, or current status.

4.2 Opening an Applicant Record

Click on any applicant row to open their full record. From the applicant record you can access their profile, submitted documents, and all linked HR actions (screening, interview, evaluation, decision).

Viewing Only

Browsing the applicant list and opening a record does not lock or change the applicant's status. Only the explicit Lock for Review action in the Applicant Review module changes the status.

5 Applicant Review

The Applicant Review module allows HR Staff to examine an applicant's submitted profile, documents, and application details before proceeding to screening.

5.1 Reviewing an Application

13. Go to Applicant List and open the applicant's record.
14. Click Open Applicant Review to enter the review module.
15. Review the applicant's personal information, education, work experience, and skills.
16. Review all submitted documents. Check for completeness and validity.
17. Note any missing required documents — these are highlighted by the system.

5.2 Locking an Application for Review

18. Once you are ready to formally begin the review, click Lock for Review.
19. The application status will change to Under Review.
20. The applicant will no longer be able to edit their application after this point.

Locking is Permanent

Locking an application for review cannot be undone. Ensure you are reviewing the correct applicant record before clicking Lock for Review.

5.3 Missing Documents

The system automatically flags any required documents that the applicant has not submitted. These will appear highlighted in the documents section. Missing documents are also visible to the applicant on their end.

- A document marked Submitted means the applicant has uploaded it.
- A document marked Missing means the applicant has not yet submitted it.
- You can add a remark to a specific document to communicate with the applicant.

6 Screening

After reviewing the application, HR Staff performs the initial screening to determine if the applicant meets the minimum qualifications for the position.

6.1 Performing a Screening Evaluation

21. Open the applicant record and navigate to the Screening module.
22. Review the applicant's qualifications against the job requirements.
23. Select one of the screening outcomes:

Qualified

The applicant meets the minimum job requirements.
The status will advance to Shortlisted.

Not Qualified

The applicant does not meet the requirements. The status will advance to Rejected.

24. Enter screening remarks explaining your evaluation (required).
25. Click Save Screening Result to record the outcome and update the status.

Remarks Are Important

Screening remarks are recorded in the ApplicationStatusHistory and are visible in the audit trail. Always provide clear, factual remarks for each decision.

7 Interview Scheduling

Once an applicant is Shortlisted, HR Staff can schedule an interview. The Interview Schedule module manages all interview bookings.

7.1 Scheduling an Interview

26. Open the applicant record and go to Interview Schedule.
27. Click Schedule Interview.
28. Fill in the following details:
 - Interview date and time — must be a future date; the system will reject past dates.

- Interviewer name.
 - Mode of interview: In-Person or Online.
 - Location (for in-person) or meeting link/platform (for online).
29. Click Save. The application status will change to For Interview.
 30. The applicant will see the interview details on their Dashboard and Status page.

Past Dates Not Allowed

The system will reject any interview date set in the past. Always verify the date and time before saving.

7.2 Updating or Cancelling an Interview

- To reschedule: open the interview record, click Edit, update the date/time, and save.
- To cancel: open the interview record and change the status to Cancelled. Add a cancellation remark.
- A cancelled interview does not automatically move the applicant back; contact HR Manager for further action.

8 Interview Evaluation

After the interview is completed, HR records the results in the Interview Evaluation module.

8.1 Recording an Evaluation

31. Open the applicant record and go to Interview Evaluation.
32. Change the interview status to Completed.
33. Enter the evaluation details:
 - Interview scores (per category or overall, depending on system configuration).
 - Interviewer remarks and observations.
 - Overall result: Pass or Fail.
 - Recommendation for next step.
34. Click Save Evaluation.
35. Based on the result, update the application status to For Final Review (if passing) or proceed accordingly.

Be Specific with Remarks

Evaluation remarks form part of the applicant's permanent record. Use objective, professional language that can be referenced during the final hiring decision.

8.2 Assessment Module (if applicable)

For positions that require a skills assessment or exam, HR can mark the applicant as For Assessment before or after the interview. Once the assessment is complete, record the result and advance the status toward For Final Review.

9 Final Hiring Decision (HR Manager / Admin only)

The Hiring Decision module is restricted to HR Managers and Admins. HR Staff cannot perform this action.

9.1 Making the Final Decision

36. Open the applicant record. The status should be For Final Review.
37. Click Hiring Decision.
38. Select one of the following outcomes:

Accepted	The applicant is hired. Status changes to Accepted.
Rejected	The applicant is not selected. Status changes to Rejected.
On Hold	Decision is deferred. The application remains in For Final Review pending further review.

39. Enter final remarks explaining the decision (required).
40. Click Confirm Decision. The status updates immediately and a record is created in Application Status History.

Status History

Every status change — including the final decision — is permanently recorded in Application StatusHistory. This record cannot be edited or deleted.

10 Reports

The Reports module allows HR and Admin to generate, view, and export recruitment reports. Reports are read-only and generated from live database data.

10.1 Available Reports

- Applicant List Report — All applicants across all vacancies, filterable by status and date.
- Pending Applications Report — Applications still awaiting review or decision.
- Interview Report — All scheduled and completed interviews with results.
- Accepted Applicants Report — All applicants with Accepted status.
- Rejected Applicants Report — All applicants with Rejected status.
- Missing Requirements Report — Applicants with incomplete document submissions.

10.2 Generating a Report

41. Navigate to the Reports module.
42. Select the report type from the list.
43. Apply any date range or filter criteria as needed.
44. Click Generate Report to load the data.
45. Use the Print or Export button to save or print the report.

11 Maintenance (Admin only)

The Maintenance module allows the Admin to manage reusable lookup values used throughout the system. Changes here affect all users and all vacancies.

Maintainable items include:

- Departments
- Job Positions
- Employment Types (Full-time, Part-time, Contract, etc.)
- Requirement / Document Types
- Interview Types
- Assessment Types

Admin Only

Only Admin accounts can add, edit, or delete maintenance values. Incorrect changes here can affect existing vacancies and applications. Proceed with care.

12 Application Status Reference

Use this table as a quick reference for all application statuses and who is responsible for each transition.

Status	Meaning	Who Sets It
Draft	Applicant created but not yet submitted.	Applicant
Submitted	Applicant submitted; pending HR review.	Applicant
Under Review	HR locked the application and started reviewing.	HR Staff
Shortlisted	Passed initial screening.	HR Staff
For Interview	Interview has been scheduled.	HR Staff
For Assessment	Applicant must take an assessment/exam.	HR Staff
For Final Review	Awaiting HR Manager/Admin final decision.	HR Staff
Accepted	Applicant hired.	HR Manager/Admin
Rejected	Applicant did not pass.	HR Manager/Admin
Withdrawn	Application cancelled before HR review.	Applicant / HR

13 Quick Reference — HR Pages

Page / Module	Purpose
HR Login	Secure access for all HR roles.
HR Dashboard	Recruitment summary — pending reviews, interviews today, open vacancies.
Job Vacancy Management	Add, edit, close, or reopen job postings.

Applicant List	Search and filter all applicants across vacancies.
Applicant Review	View full profile & documents; lock application for review.
Screening	Mark applicant as Qualified or Not Qualified with remarks.
Interview Schedule	Book, edit, or cancel interview slots for shortlisted applicants.
Interview Evaluation	Record interview scores, remarks, and pass/fail result.
Hiring Decision	HR Manager/Admin final Accept, Reject, or Hold decision.
Reports	Generate and export recruitment reports.
Maintenance	Manage departments, positions, requirement types, and more.

14 Audit Trail

The system automatically logs significant actions in the Audit Trail. This includes all status changes, document verifications, screening results, interview actions, and hiring decisions.

The Audit Trail records:

- The user who performed the action.
- The date and time of the action.
- The type of action performed.
- The applicant and application affected.

Audit Trail is Read-Only

No user — including Admin — can edit or delete entries in the Audit Trail. It is a permanent, tamper-evident log of all HR activity.

For system issues, contact your system Administrator.
